

EYE SPY

A dynamic program for young children and adults to explore, enjoy and learn about the museum together.

Get up close to some real animal specimens to look at and talk about. Listen to a story, look around the galleries and draw what you see.

Eye-Spy is designed for pre-school children and adults to actively learn and discover the museum together; younger siblings and friends are also welcome. Each session is led by experienced museum staff.

Please note: these programs are not suitable for large groups. The same program is repeated each month to encourage as many people to participate as possible.
